

Johnston and the Housing 2030 goal

Housing 2030 growth category: Modest · goal 375 homes permitted 2026–2030 (56 affordable), about 75 a year

75	68	18	37
homes a year the goal asks for	permitted in 2025, by the State's survey (91% of the yearly pace)	permitted in 2025, by the town's reports to the Census (24%)	certificates of occupancy in 2025, by the State's survey

The goal is written in permits, and the State has not said which count will measure it. For Johnston the two counts agreed in 6 of the last eight years.

The State's 2025 report marks this municipality as not having completed its survey before publication, yet prints figures for it.

NEW HOMES PERMITTED, TWO GOVERNMENT COUNTS

Year	Census Building Permits Survey	State municipal survey	Same?
2018	16*	16	yes
2019	31	31	yes
2020	33*	33	yes
2021	39*	39	yes
2022	35	35	yes
2023	14*	14	yes
2024	21*	86	
2025	18*	68	

WHAT THE QUARTERLY UPDATE ADDS

Each quarter: the latest Census months against the pace the goal requires, the State's numbers when they publish, and, where the town shares its permit log, a permit-by-permit reconciliation of the two counts, so the number the town reports is the number it can defend.
