

North Smithfield and the Housing 2030 goal

Housing 2030 growth category: Continued · goal 107 homes permitted 2026–2030 (16 affordable), about 21 a year

21	35	4	8
homes a year the goal asks for	permitted in 2025, by the State's survey (167% of the yearly pace)	permitted in 2025, by the town's reports to the Census (19%)	certificates of occupancy in 2025, by the State's survey

The goal is written in permits, and the State has not said which count will measure it. For North Smithfield the two counts agreed in 5 of the last eight years.

The State's 2025 report marks this municipality as not having completed its survey before publication, yet prints figures for it.

NEW HOMES PERMITTED, TWO GOVERNMENT COUNTS

Year	Census Building Permits Survey	State municipal survey	Same?
2018	30*	18	
2019	28*	28	yes
2020	16*	16	yes
2021	9	15	
2022	11	11	yes
2023	7	7	yes
2024	37	37	yes
2025	4	35	

WHAT THE QUARTERLY UPDATE ADDS

Each quarter: the latest Census months against the pace the goal requires, the State's numbers when they publish, and, where the town shares its permit log, a permit-by-permit reconciliation of the two counts, so the number the town reports is the number it can defend.
